

Statement of Work
Media Support Contract
U.S. Environmental Protection Agency

Background and Purpose:

EPA's Office of Public Affairs (OPA) is responsible for working with media to provide the public with timely, coherent information on environmental issues, and EPA actions and policies. Whether providing the media with press announcements; responding to media inquiries; or reacting to published stories, OPA works to achieve articles that accurately represent EPA's perspective. In order to accomplish this goal, OPA must constantly monitor media coverage and respond to inaccurate or incomplete stories. OPA may choose a number of methods to address these stories, including contacting reporters and editors to request corrections. OPA's ability to successfully address inaccurate or incomplete stories before the stories influence other reporters or are widely read is largely dependent on its ability to identify those stories shortly after publication, and OPA requires contractor support in order to do so.

Scope of Work

EPA requires four basic services:

- delivery, via email and in near-real-time, of media stories involving relevant events, announcements and issues, with trend analysis included;
- delivery, via email, of a once-daily (Monday through Friday) compendium of news coverage of EPA and environmental issues, including a trend analysis;
- delivery, via email and in near-real-time, of media stories on high-priority issues and/or media outlets as determined through ongoing discussions between OPA and the vendor
- delivery, via searchable database, of all past media stories gathered under the other assigned tasks

The selected vendor shall be responsible for obtaining the necessary licenses (via Factiva, Lexis Nexis or similar service) to provide this service to OPA.

Accompanying these deliverables, selected vendor shall provide exceptional customer service, including 24/7 access by EPA to contractor's account managers, analysts, and senior managers, to permit last-minute changes to topics, deadlines, and specific guidance from OPA to the contractor regarding stories to be included and the extent of coverage desired.

Deliverables shall:

- include articles and broadcasts from major U.S. newspapers, national television and cable news, news weeklies, relevant ~~magazines~~ and journals, blogs, specialty press, etc.;

- reflect understanding of EPA's mission and interests;
- characterize, when requested, the coverage such that EPA officials can quickly get a sense of how widely various story elements were run and what the general tone is; and
- provide links within the coverage to the original full-text versions and to streaming video of important television as originally broadcast.
